

 Dimplex

Luxury wood

Unique scent sensation exclusively for
our Optimyst fireplace systems!

Give your Optimyst fireplace an extra dimension by adding a scent.
We will introducing our scented module exclusively for the
Optimyst fireplace systems.

Scents evoke feelings and emotions, for an even cosier experience, that sense of a warm welcome home. This new addition makes our fireplace even more versatile. Our first scent is a luxurious and spicy sandalwood. A warm sensation featuring tones of lavender, tonka beans and a hint of wood fire.

The scent module is a holder containing individual scent pads. Simply position the holder and scent pad inside the fireplace. Your fireplace will disperse a subtle hint of the scent around your room. Each pad will emit scent for around 90 hours (pad remains scented for around 30 days after opening). The module is also suitable for use in previous models of fireplace. The fragrance system has been developed exclusively for Dimplex.
